i hate finding out a year later that my ex managed to screw me over ONE MORE TIME....

the cd's he burned for me right when we broke up, the one that contains my webpage that i spent YEARS working on....

he burned it wrong.

it reads on a new cd-rom like an audio track that is unreadable.  
on an old cd-rom, it reads SOME files. others, it just locks up.

gee, yet ANOTHER reason to want him dead....
